IS YOUR WATER SAFE TO DRINK?

The District recently sent out the annual Consumer Confidence Report (CCR) as required by law. In 1996, the U.S. Congress amended the Safe Drinking Water Act, adding a requirement that every water system must prepare and deliver to their customers a brief annual water quality report. The CCR summarizes water quality information from testing completed throughout the water system. The purpose of the testing is to ensure that **YOUR WATER IS SAFE TO DRINK** and complies with all of the water quality health standards.

When the District first took over operation of the water system three wells were in use that exceeded the Arsenic water quality standard. These wells have been taken off-line and are not used in the water system. **YOUR DRINKING WATER DOES NOT CONTAIN ARSENIC** that exceeds the health standards.

Please call if you have any questions regarding the quality and safety of your water—760-951-0006

The Board designated \$152,000 be put in restricted emergency reserves and the balance in unallocated reserves for use during the year as needed.

A series of workshops were held to provide information for the Board members and the community on the various categories in the budget. The Helendale CSD budget is available in the District office if you would like to review it or pick up a copy.
